

Detroit Claims Super Bowl Victory with MOTOMESH

Multi-Radio Mobile Broadband System Provides Video Surveillance and Wireless Network Access for Super Bowl XL Security

“ With the stadium in the heart of downtown Detroit, we needed a solution that would boost officials’ situational awareness at entrances and exits to the grounds. Motorola’s solution allowed our officers to monitor a large area and population right from their laptops, while remaining in their dispatched areas.”

– Derrick Miller, Chief Information Officer for the City of Detroit

While the players took risks between goal lines, the City of Detroit took no chance with the safety and security of attending Super Bowl XL fans. The city turned to Motorola to extend its watch over public safety. Motorola’s expertise ensured Detroit police had real-time access to the pre-emptive intelligence necessary to keep the Super Bowl safe. Motorola’s MOTOMESH multi-radio mobile broadband system delivered seamless video connectivity over a secure, 4.9GHz wireless network to law enforcement personnel and vehicles around the perimeter of Ford Field.

Intelligence You Control

MOTOMESH technology puts intelligent video surveillance and control firmly in the hands of Detroit police. Officers could pan and zoom while viewing live, streaming video at mobile command posts on rugged, Motorola ML900 laptop computers. The MOTOMESH network enabled full access to criminal databases, remote digital reporting, multimedia e-mails, and other applications wirelessly, and at broadband speeds.

Reliability When You Need it Most

Detroit police relied on Motorola’s complete, end-to-end, wireless broadband solution for mission-critical communications. Originally developed for battlefield communications, the MOTOMESH network provided a survivable and scalable solution that enhanced the city’s ability to detect, prevent and respond.

A Reputation You Can Trust

When the City of Detroit turned to Motorola to provide secure, mission critical systems for the public safety of over 65,000 attendees, a perfect relationship resulted. Motorola’s technological innovation and expertise provided a simple and seamless solution that allowed law enforcement personnel to increase their presence and improve response capabilities.

Over 65 Years of Understanding the Needs of Public Safety

In today’s world, you need a solutions provider that understands what Mission Critical is all about: the lives and well-being of your employees and the citizens they protect. That’s why Motorola is a leading provider of interoperable communication systems for public safety, first responders and government agencies. Our experience, along with our skills, people, partnerships and alliances, allow us to build innovative, fully integrated technologies that let organizations like yours share vital information with ease and confidence. We’ve been doing it for 65 years, and we’ll be standing by our customers for years to come.

We are committed to bringing all of our knowledge and technical expertise together, so you can focus on what you do best... to serve and protect the public.
